**RE: MARINUS HAVENGA COETSEE**

I have known the above mentioned for close to 3 years now. I first met Marinus in his capacity as the CEO of Brolaz Projects Kenya Limited-a telecommunications service provider operating out of South Africa and with offices all over Africa.

In the years I have known Marinus, his integrity and level headness has always shown in the many projects we have handled. His experience in handling many huge projects without necessarily losing grip of any one of them has always not only impressed me but also kept our cooperation above board.

I remember an instance recently in South Africa where we had an urgent project to run in which Marinus was the head of the Team. It was a good test for all of us. The project ran into problems since we had delays from our suppliers in Europe and the client became impatient and threatened to cancel the project. Whilst most of us panicked,Marinus was always calm and his project public relations skills really saved the day. I can only assume this was due to the tremendous experience he has under his belt.

We have continued working closely with Marinus closely on an array of projects. Apart from his special skills, Marinus has demonstrated exceptional organizational prowess and great interpersonal relationships with all kinds of people, and I have also found him to be very adaptive and smart. He has a clear focus which drives him to achieve his targets in an effective manner and without compromising on quality.

To this end,I have no hesitation in greatly recommending Marinus Havenga Coetsee.Should more information be sought concerning the bearer of this letter,feel free to contact the undersigned.

Yours Faithfully,
